Experience Africa from an eagle's perspective – take off with us into the open skies in our hi-tech Micro-light that allows for a totally uncluttered view of the savannahs, mountains, and deserts. It provides the ideal platform for photography and filming by giving you access to areas otherwise unreachable by conventional transport. (Itineraries on request.)

**Microlight Safaris • Film Crew – Location Support**

The only limitations are those of your own imagination, so let us help you to free your mind by soaring over the most spectacular destinations imaginable – In fact the sky has no limits! By means of our exclusive Motorhome, the Microlight can be used like a flying tripod to experience the eagle's point of view of untouched Africa's most remote and exclusive areas.

Enjoy the wilderness at its level best – from below and above!
